BILLA

Slim bag for laptop

FOR DAYS WHEN PLANS CHANGE

Billa starts out as a sleeve and adapts to whatever’s on your agenda: carry it by the handles, or over your shoulder with the strap when you need to get moving. The coated polyester is water-resistant, so a sudden shower won’t force a change of plans. Phone, keys and documents go in the roomy flat front pocket.

NOTHING FALLS OUT OF STYLE

The compartment is reserved for your computer and holds it in place with the neoprene corners of the Anti Slip System. If the zip is left open in a rush, the laptop won’t slide out. For anyone on the move all day, that’s one less thing to worry about.

BILLA

Slim bag

Slim bag for laptops and MacBook Pro, available in two sizes. Made from water-resistant coated polyester [RPET], it has a very slim, compact profile. The main laptop compartment features the neoprene corners of the Anti Slip System, which hold the computer in place even if the zip is left open. A roomy flat front pocket, a removable shoulder strap and handles complete the bag. On the back, a trolley sleeve slides over the handle of your luggage. The lining comes in a shade paired with the outer colour.
