IPKBCASE11

TOUCHPAD KEYBOARD CASE FOR IPAD A16

NEW

Transform your iPad | The Macally iPad keyboard case has a modular design that consists of two parts -a keyboard with backlit keys, a large intuitive touchpad and support and a hard-shell back cover- that, depending on your needs, can be used together and independently. The magnets ensure that the parts are securely attached and detached from each other to allow you to easily switch between a laptop-like work experience and a light weight case in your hand!

Smart illuminated keyboard | The keyboard has thin Scissor-Switch keys (15 x 15 mm, Apple MacBook Pro 17 x 17 mm) with a soft keystroke for a comfortable typing experience. The top row consists of iPadOS shortcut keys that allow you to perform specific tasks with a simple keystroke (Decrease/Increase brightness, Onscreen keyboard, Spotlight, etc). The backlit function (Off, low, medium, high) allows you to type comfortably in the dark. Finally, you can connect the keyboard to two Bluetooth devices at the same time, allowing you to switch between them easily.

Large intuitive touchpad | The large and smooth touchpad supports Multi-Touch gestures and precise cursor control, allowing you to do everything you would normally do with your fingers on your iPad, such as navigating, clicking, scrolling, etc. To extend battery life, you can turn off the touchpad. (Note: The touchpad only works on iPad NOT on a Mac, a mouse is then required.)

Bluetooth and rechargeable | Your keyboard is seamlessly connected to your iPad in a few seconds. You can connect the keyboard to a second Bluetooth device, such as your Mac or iPhone, at the same time after which you can easily switch between the two devices. The built-in battery provides many hours of work, play and viewing pleasure! (Battery life varies by use, settings and environmental conditions.) You can turn off the keyboard with the Power On/Off key, but it also turns off automatically after some time of inactivity. And when the battery runs out, you can charge it in two hours using the included USB-C cable.

Your view, your way | The kickstand, that is attached to the keyboard, is fully adjustable for the best viewing angle ranging from 15 to 75 degrees, both in landscape and in portrait mode. Most of the time the iPad will be used in landscape mode, but you can easily detach the iPad from the kickstand to reattach it in portrait mode, ideal for reading or browsing social media.

Comprehensive protection | The iPad keyboard case offers a lot of protection. The case has a form-fit design with soft protruding corners for extra protection. The keyboard and kickstand provide extra protection giving the whole thing a stylish and sturdy appearance. There is space on the side to hold and charge the Apple Pencil.

Whether you work, watch movies and series, browse social media on your iPad, the stylish and sturdy Macally iPad keyboard case is truly the only keyboard that you need for all your needs!

Features

- Modular 2 piece design allows you to switch easily between laptop and case modes
- Thin Scissor-Switch keys with soft keystroke for a comfortable typing experience
- Shortcut keys for one-touch control of iPadOS applications and enhanced productivity
